SEAMLESS

Whether you're hustling through errands, sweating at the gym, relaxing at home, or a mix of all three, let your performance wear work for you.

Introducing knitwear that utilizes cotton and cotton blends to provide added comfort and performance.

Design flexibility and ease

Complex fabric and garment constructions easily achievable

Environmentally friendly

No fabric waste in the construction process

Maximum comfort

Engineered with minimal to no seams

Advanced performance

Enhanced through functional finishing

STYLE

Cotton Incorporated has collaborated with leading equipment and sweater manufacturers to offer the ultimate comfort and performance for cotton knitwear. From minimal seams to no seams at all, these knitwear collections are designed to inspire your own creativity and demonstrate the possibilities with cotton knitwear.

ADVANCED

These unique constructions for cotton knitwear combined with enhanced technology create the ultimate performance knit. Cotton performance technologies can be added to the garment or to the yarn in specific zones to create the perfect knit for even the toughest challenges.

Water REPELLENT

STORM COTTON™ technology repels water with the breathability of cotton. This functional knit looks and performs so good, you won't want to save it for a rainy day.

WHOLEGARMENT 3D[®]

KNITTING TECHNOLOGY

Shima Seiki U.S.A. Inc.'s revolutionary WHOLEGARMENT[®] knitwear is produced in one entire piece, three-dimensionally, directly on the knitting machine. Garments require little to no sewing, saving time, money and waste. The seam-free construction of WHOLEGARMENT[®] products produce the ideal comfort and consistency in fit for knitwear.

Printed with WICKING WINDOWS[™] technology in strategic sweat zones.

100% cotton long sleeve jacquard tech top with articulated sleeves for motion comfort.

Seam elimination for smooth comfort.

Fine reverse jersey yarns create a drastically lighter weight garment.

Seam elimination for smooth comfort.

100% cotton space dyed.

Jersey/reverse jersey and jacquard construction.

Andari

Technology available at Andari Fashion, Inc.

FULL FASHION

KNITTING

Stoll America's flat bed knitting machines produce fully fashioned garment pieces using inverse plaiting techniques. The garment shape is achieved on the knitting machine as each piece is knitted with no raw edges. Pieces are sewn using linking or cup seaming to create a comfortable knit for active lifestyles.

Fully fashioned jacket pieces assembled by linking.

Mercerized cotton and nylon yarns create high power stretch and sheen.

STORM COTTON™ technology applied in garment form.

Fully fashioned, quilted jacket pieces are assembled by linking.

STORM COTTON™ technology applied in garment form.

Double knit, space dyed, diamond blister with rib sleeves.

SEAMLESS GARMENT

TECHNOLOGY

Using a unique circular knit machine, seamless garment technology is available for cotton. The technology produces the entire garment on the machine with no assembly or linking required. The elimination of seams reduces chafing, improves range of motion and allows the cotton fabric to conform to the shape of the body. Seamless technology also offers unique design capabilities to incorporate performance features like moisture wicking yarns and ventilation through construction.

Unique construction to improve ventilation.

TransDRY® technology provides moisture wicking performance.

Cotton/nylon/Spandex pique fabric for maximum stretch and range of motion.

Unique construction to improve ventilation.

TransDRY® technology provides moisture wicking performance.

Cotton/nylon/spandex jersey for ultimate stretch and comfort.
