1 in 10 childrenswear items at retail are marketed with a performance feature, with the most common being:

- flame resistance
- stretch
- shrink resistance

3 in 4 childrenswear items at retail contain cotton.
86% of parents prefer their children wear cotton-rich clothing.

2 in 3 parents say they are willing to pay a premium to keep their children’s clothing cotton-rich.

52% of parents have taught their kids to check fiber content labels, and 89% of these parents also teach their kids to check for cotton.

50% of parents say they are bothered by fiber substitution away from cotton in their children’s clothing.

"I have used [brand] polo shirts for five years for my boys’ school uniforms. This year, they changed the shirt from a cotton/poly blend to all polyester. The shirt is so thin you can see through it. My boys don’t want to wear a T-shirt under their school shirt, so these will not work. Returning them."
