

1

FABRIC MANUFACTURERS

+ Control of HVI properties allows EFS® licensees to more easily match fabric manufacturer.

**STRONGER YARN
QUALITY
CONSISTENCY**

+ Stronger yarn due to improvement in variation-related strength can result in a stronger fabric and potentially less end breaks in weaving.

+ Less frequent yarn lot changes benefits knitting operations.

**UNIFORM
CONTROL
PROCESS**

+ Uniform micronaire is very critical for a uniform dyeing process and results in less lot-to-lot variation.

+ Control of micronaire and plus B reduces the chance of variation-related shade, whiteness as well as barré.

DYEING and FINISHING OPERATION

2**3**

GARMENT MANUFACTURERS and RETAILERS

+ Fabric and dyeing improvements result in better quality garments and reductions in cutting loss.

**ENVIRONMENT
EFFICIENCY
TRACEABILITY**

+ Environmental responsibility: With EFS® software there is a potential reduction in shipping logistics, fewer fabric defects (or seconds), overall production efficiency improvements, and the option for traceability.
